Yifan Zeng

Ph.D. Student · RL for LLM Agents

zengyif@oregonstate.edu xhmy.github.io GitHub Google Scholar LinkedIn

Education

Oregon State University Corvallis, OR
Ph.D. in Computer Science 2023–Spring 2028 *(expected)*

- Advisor: Prof. Huazheng Wang
- Research Areas: RL for LLM Agents, Multi-Agent Systems, LLM Robustness
- Publications: 12 papers (6 first/co-first author), incl. NeurIPS, ICLR, EMNLP
- Service: Reviewer for ICLR, NeurIPS, AAAI, and WWW (2025–2027)

Zhuhai College of Jilin University Zhuhai, China
B.E. in Data Science 2019–2023

- GPA: 3.84/4.00, Rank: 1/249

Industry Experience

Research Scientist Intern | Adobe Jun 2026 – Sep 2026

- Developed SkillSaw, a training-free search over how procedural knowledge is divided into agent skills: it regroups verifiable knowledge atoms and rewrites skill descriptions from routing and task-success evidence (paper under review)
- Significantly raised held-out success on 7 of 9 benchmark–model pairs (none regressed), gaining 12–22 points on AppWorld and LiveMath under every executor
- Gains track receipt: the skill holding knowledge a class of tasks needs, rarely opened before, is opened far more often while each episode loads a small share of the library
- Applied to Adobe Experience Platform Agent Orchestrator and other agent harnesses

AI Agent Research Intern | AG2AI Jun 2025 – Sep 2025

- Co-first author of SimpleDoc (EMNLP 2025 Main): a document-QA agent that retrieves pages with visual embeddings plus LLM re-ranking over page summaries, then iteratively refines its query using a working memory
- Outperformed prior baselines by 3.2% on average across 4 DocVQA benchmarks while retrieving far fewer pages; open-sourced as ag2ai/SimpleDoc

Applied Scientist | Quanbao Network Technology Apr 2022 – Aug 2023

- Built self-supervised pretraining and object detection for bronchoscopy landmark detection (deployed on endoscopic devices) and railway ultrasonic defect inspection

Academic Experience

Oregon State University Mar 2024 – Present
Graduate Research Assistant Mar 2024 – Present

- **Multi-agent RL for LLM workflows** (first author): built GRPO training on verl with shared or per-role LoRA policies and vLLM rollouts; identified when RL training helps a workflow and how to train each policy-sharing strategy: reweighting per-role gradient share lets a shared policy learn as fast as per-role policies, and merging the optimizer steps of parallel roles delays the late-training decline of per-role policies
- **LLM alignment**: co-first author of an analysis of failure modes in margin-based preference optimization (ICLR 2025); built RLHF pipelines (SFT, reward modeling, preference optimization) with TRL
- **Safety and robustness**: AutoDefense multi-agent jailbreak defense (featured on the AutoGen blog), prompt-injection attacks on LLM rankers (EMNLP 2025 Main), and LLM-RankFusion for ranking consistency (TMLR)

Graduate Teaching Assistant Sep 2024 – Jun 2025, Sep 2025 – Present

- TA for graduate and undergraduate CS courses; mentored AI Capstone teams building LLM-agent RAG products for funding and patent search

Skills

LLM Post-Training & RL: SFT, RLHF, Preference Optimization (DPO), Online RL (GRPO, PPO) for Tool-Using, Long-Horizon, and Multi-Agent Workflows, Reward Design and Modeling, LoRA, Multi-Node Distributed Training (DP/TP), Inference-Time Scaling (Best-of-N, Tree Search)

LLM Agents: Multi-Agent Workflows, Agent Harness and Skill-Library Optimization, Agent Memory, Tool Use (MCP), Long-Horizon Tasks, Agent and Prompt Optimization

Evaluation & Safety: Agent Benchmarks, Trajectory Evaluation, Failure Attribution, LLM-as-Judge, Jailbreak Defense, Prompt Injection

Retrieval & Ranking: LLM Rerankers, Rank Aggregation, Multi-Modal Document RAG

Frameworks: PyTorch, verl, Hugging Face (Transformers, TRL, PEFT), vLLM, Ray, Docker

Selected Publications

First or Co-First Author

1. **Yifan Zeng**, Yiran Wu, Yaolun Zhang, Wentian Zhao, Kun Wan, Qingyun Wu, Huazheng Wang. **When Does Multi-Agent RL Improve LLM Workflows? Workflow, Scale, and Policy-Sharing Tradeoffs**, *arXiv preprint arXiv:2605.24202*, 2026.
